

# Broadcom Tech Day 2024

at Mohegan Sun

**OCTOBER 18, 2024 | UNCASVILLE, CONNECTICUT**

## Overview

Broadcom will be hosting a half-day event for its customers and partners on October 18, 2024 at Mohegan Sun in Uncasville, Connecticut. The day begins with lunch, followed by an afternoon of product and thought leadership sessions. The following highlights the sessions planned for the Data & Network Security track. After these sessions, attendees are invited to expand their peer network at a cocktail reception and then join us for dinner at Michael Jordan’s Steakhouse.

## Data & Network Security Track

Time	Session Title & Descriptions
1:30pm – 2:30pm	<p><b>Preparing for Q-Day: Quantum Computing’s Impact on API Security</b></p> <p>Quantum computing may seem like a distant-future technology, but given the pace of enterprise modernization, the quantum threat could be just around the corner, with APIs as a primary target. When exactly will “Q-day” arrive? No one knows, and the scale of corrective measures required for your API infrastructure is equally uncertain. In this session, we will highlight the new security risks introduced by quantum computing, the specific vulnerabilities associated with APIs, and how and when you need to start preparing your APIs. Additionally, we will explore the costs involved in API retrofit projects and discuss insights from post-quantum API security research and initial tests.</p> <p><b>Speaker: Francois Lascelles</b></p>
2:30pm – 3:30pm	<p><b>The Future of Secure Access with Symantec ZTNA</b></p> <p>Let’s face it, using a VPN is a compromise—users want easy access to resources, but you must deliver locked-down security. Traditional VPNs fall short in today’s security landscape. Discover how Zero Trust Network Access (ZTNA) offers superior protection and user experience by attending this session and hearing from Kyle Black, Symantec ZTNA expert and contributor to NIST’s Zero Trust Architecture. You’ll learn why ZTNA outperforms your VPN to deliver enhanced security and happier users, explore key benefits and use cases of ZTNA that provide more secure access, and see what only Symantec can offer through live demos, including integration with DLP policy enforcement, full content inspection, browser isolation, and more.</p> <p><b>Speaker: Kyle Black</b></p>
3:30pm – 4:00pm	Break

Time	Session Title & Descriptions
4:00pm - 5:00pm	<p><b>Data Security - Not Just for the AI Generation</b></p> <p>Data is the lifeblood of an organization, flowing everywhere and making security a growing challenge. The ability to generate vast amounts of data in various forms and locations seems limitless, further complicated by regulations that impose stricter requirements and fines. Boardroom discussions around generative AI are adding complexity, making this an ideal time to reassess your data modernization approach and the critical role of security. In this session, we will explore these challenges and offer guidance on how to modernize data practices while embedding security tools to safeguard your data in a secure and future-proof manner.</p> <p><b>Speaker: Tobias Pischl</b></p>
5:00pm - 6:00pm	<p><b>Enhancing Security in Modern IT Environments: Evolving PAM for Tomorrow's Needs</b></p> <p>As organizations modernize their IT environments, efficiency, scale and convenience are essential for adoption. Whether you are a PAM end user or administrator, Broadcom focuses on ensuring that your business needs are met while optimizing the overall experience and security posture. In this session, we will discuss how our PAM solution is evolving for modernized IT ecosystems by introducing PAM as a Gateway and Live Upgrader as two key capabilities.</p> <p><b>Speakers: Joe Burke, Michael Dullea</b></p>

Join us at the Mohegan Sun for an event designed to empower your business, build your networks, and help you accelerate the value you are getting for your Broadcom software investments by clicking the button below.
